## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

2. The information Disclosure Statements (IDSs) received on March 24, 2004 and September 2, 2005 have been received and the initialed copies (two pages) of the IDSs are attached with this correspondence.

### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 and 2 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed subject invention is not limited to practical application. Viewed as a whole, the claimed invention is merely bit developing, bit shifting, overflow detecting and prediction signal outputting in claim 1 and selector receiving the an upper limit to select between the bit-developed mantissa part or bit-shifted mantissa part according to the overflow in claim 2. It does not impart any function to the "ADPCM" recited in the preamble.

It should be noted that the preamble of the claim is not given weight unless it is reflected in the body of the claim.

***Allowable Subject Matter***

4. Claims 3-4 are allowed.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent numbers 5,041,830 and 5,657,350 issued to disclose an adaptive DPCM

US patent number 5,369,791 issued to disclose ADPCM having means for muting the received signal.
